

## HyperScale Storage Guarantee

### Atlantis HyperScale™ Storage Guarantee

Atlantis HyperScale is a hyper-converged appliance sold on Cisco, HP, Lenovo and SuperMicro servers through Atlantis Computing channel partners. The Atlantis HyperScale Storage Guarantee ensures that customers receive the specified amount of effective storage capacity. We are able to offer this guarantee because of the performance and de-duplication capabilities of our patented Atlantis HyperDup™ technology.

#### HOW DOES THE ATLANTIS HYPERSCALE STORAGE GUARANTEE WORK?

1

Purchase an Atlantis HyperScale product of 12TB, 24TB or 48TB from a certified channel partner.

2

Deploy Atlantis HyperScale and fill up the storage volumes with data, VMs, or anything else you want to throw at it.

3

If you don't receive the purchased effective capacity out of your storage, Atlantis will provide additional capacity software.

#### Terms:

- New Atlantis HyperScale products sold by certified channel partners only
- Customers must fill all storage volumes to at least 80% of the purchased effective capacity
- Data reduction rates must remain consistently below 70% for 30 days to qualify
- Customers that consume 10% or more of their storage volume capacity with encrypted or compressed (images, audio and video) data will not be eligible for the Atlantis HyperScale Storage Guarantee
- Customer must perform a good-faith installation with phone-home enabled
- Remedies other than additional Atlantis storage capacity software licenses are at the discretion of Atlantis Computing
- Additional server or storage hardware is not provided as part of the guarantee

To learn more or submit a request for additional capacity, visit [www.atlantiscomputing.com/hyperscaleguarantee](http://www.atlantiscomputing.com/hyperscaleguarantee)
